Experiences

Shoobilee (Baldwin Park, California)

Front-end Web Developer

Aug 2017 – Present

- Convert PSDs to HTML using CSS and Bootstrap
- Build out weekly HTML email campaigns and uniquely target segmented email lists
- Maintain and update new features for the Shoobilee website

Olivet International (Los Angeles, California)

Quality Assurance Team Lead

2015 – 2016

- Led design team & sales team to improve the aesthetics and functionality of end product

Times International Language Center (Taipei, Taiwan)

Business English Teacher / Consultant

2006 – 2015

- Designed new curriculums and testing standards resulting in 20% more students on the waiting list.

Web Applications

DayMakr [Live](#) / [Github](#)

A day planner that picks the top 3 places to eat and the top 3 activities to do in the city of your choice.

- Created service to pull data from the Yelp, Google Maps & Weather API
- Built UI allowing user to select from destinations, restaurants, and activities
- Structured and styled app using modern HTML5 and CSS3 techniques

Memory Match [Live](#) / [Github](#)

A Teen Titan themed card-matching game for children of all ages.

- Used responsive design to display game statistics and specs
- Implemented site using Bootstrap CSS library
- Integrated game logic for card randomization, animation states & sound effects

League of Boatwrights [Live](#)

A website dedicated to small boat enthusiasts passionate about boat-building.

- Used mockups and created pixel perfect UI
- Created sorting component that calls database with sort and filter parameters fetching results
- Designed site modularly using content types, blocks & views

Bookswopp (currently in progress) [Sample](#) / [Github](#)

An online book swapping community for parents with bookshelves filled with books their kids no longer have an interest in.

- A web-app currently being built with Ember.js
